EDUCATION

The University of British Columbia
Bachelor of Science - Intended Major: Computer Science

Vancouver, BC
Expected Graduation: May 2029

EXPERIENCE

Game Development and UI Design

May 2024 – Present

Freelance

Calgary, AB

- Contributed to multiple hackathon projects, primarily focusing on 3D UI design
- Developed VR apps in Unity, and contributed to ongoing ROBLOX projects
- Improving skills in communicating and working within a team environment

Math Teaching Assistant

Feb. 2025 – Jun. 2025

Henry Wise Wood High School

Calgary, AB

- Assisted with marking tests, keying worksheets, and photocopying to support in-class math instruction
- Developed and strengthened communication skills, regularly working with various math department teachers
- Provided individual student support with the objective of improving math-based learning outcomes

Badminton Coach

October 2024 – June 2025

Badminton Alberta

Calgary, AB

- Instructed weekly badminton lessons for youth aged 7-17 across multiple locations
- Built relationships with students and colleagues, maintaining a positive and safe learning environment
- Developed communication and leadership skills in practical workplace scenarios

EXTRACURRICULAR ACTIVITIES AND AWARDS

- 1st Place, Hack and Seek XR Hackathon 2024 - GYM SIM
- 2nd Place, Hack and Seek XR Hackathon 2025 - Market Mayhem
- 3rd in Junior Track, natHacks 2024 - MindMedVR
- HWW Award of Excellence in Physics 30
- HWW Award of Distinction in Computing Science 30

PROJECTS

MindMedVR | Python, C#, Unity, OpenBCI, VR

Nov. 2024 – Dec. 2024

- Developed a VR meditation game utilizing EEG brainwave data to improve focus in healthcare professionals
- Utilized real-time detection of alpha, delta, and beta waves in the brain to dynamically adjust gameplay
- Developed experience with team collaboration in a hackathon setting, and technical skills in VR, C#, and Unity

GYM SIM | C#, Unity, VR

May 2024 – May 2024

- Developed a VR gym simulation game focused on rehabilitation and proper form without weights
- Utilized haptic feedback in order to give active, corrective input on form
- Led UI design and coordinated team direction, ensuring clear and necessary communication
