EDUCATION

The University of British Columbia

Bachelor of Science - Intended Major: Computer Science

GPA: 4.33/4.33

Vancouver, BC

Expected Graduation: May 2029

EXPERIENCE

Math Teaching Assistant

Henry Wise Wood High School

Feb. 2025 – Jun. 2025

Calgary, AB

- Supported **30+** **International Baccalaureate** math students through tutoring and assignment feedback
- Collaborated with math department teachers to develop and print supplementary learning materials, used by **150+** **students** across multiple grade levels

Badminton Coach

Badminton Alberta

October 2024 – June 2025

Calgary, AB

- Instructed weekly lessons for **12+** youth aged 7-17, developing **individualized training plans** based on skill level
- Maintained safe, engaging learning environment while building relationships with students and colleagues
- Progressed beginner students to **rally-ready** skill level **within 2 months**

EXTRACURRICULAR ACTIVITIES AND AWARDS

- 1st Place, Hack and Seek XR Hackathon 2024 - GYM SIM
- 2nd Place, Hack and Seek XR Hackathon 2025 - Market Mayhem
- 3rd in Junior Track, natHacks 2024 - MindMedVR
- HWW Award of Excellence in Physics 30
- HWW Award of Distinction in Computing Science 30

PROJECTS

NBA Fantasy Basketball Assistant | *React.js, TailwindCSS, Express.js, Node.js, MongoDB, JWT, REST APIs* Jan. 2026

- Built a full-stack web application for fantasy basketball analysis with simple user authentication, roster management, and real-time NBA data integration via external APIs
- Engineered start/sit recommendation algorithm, analyzing player matchups, recent performance trends, and head-to-head team matchups
- Implemented **JWT-based** authentication and **MongoDB schema** design for data persistence across users
- Integrated a **caching** layer to optimize API costs and reduce response times

DermAI - JourneyHacks 2026 | *React.js, Next.js, Supabase, Google Gemini API, TailwindCSS* Jan. 2026

- Built AI-powered skin analysis app using Google Gemini's API to detect concerns from photo input
- Implemented Google OAuth and PostgreSQL-backed scan history for personalized progress tracking
- Engineered recommendation engine, matching detected skin concers to products, and enforced structured JSON responses for reliable AI responses

MindMedVR | *Python, C#, Unity, OpenBCI, VR* Nov. 2024 – Dec. 2024

- Developed a VR meditation game utilizing EEG brainwave data to improve focus in healthcare professionals
- Designed and implemented 3D UI components and immersive VR scenes in Unity for a meditation experience
- Integrated real-time EEG-driven gameplay parameters into Unity scenes to reflect user stress levels

Subscription Status Classifier | *R, Tidymodels, Tidymodels* Nov. 2025 – Dec. 2025

- Led a **team of 4** to develop a subscription status classifier tool using Minecraft server data
- Implemented and trained a **KNN classification** model in R using **Tidymodels**, including **feature pre-processing** and **cross-validation** for parameter selection

TECHNICAL SKILLS

Languages: Java, Python, Lua, C#, Racket, R, JavaScript, HTML / CSS

Frameworks / Libraries: React.js, Node.js, Express.js, TailwindCSS, MongoDB, Tidymodels

Tools: Git, VS Code, Supabase, Postman, Unity, Android Studio, IntelliJ, Jupyter Notebook
